

Threaded

```
graph BT; FileWriter --> Threaded; NetReader --> Threaded; StatsWriter --> Threaded;
```

The diagram illustrates a class hierarchy. At the top is a box labeled 'Threaded'. Below it, a horizontal line connects three boxes: 'FileWriter' on the left, 'NetReader' in the center, and 'StatsWriter' on the right. A vertical arrow points upwards from the 'NetReader' box to the 'Threaded' box, indicating that 'NetReader' inherits from 'Threaded'. The 'FileWriter' and 'StatsWriter' boxes are also connected to the same horizontal line, suggesting they also inherit from 'Threaded'.

FileWriter

NetReader

StatsWriter
